

# How to create your first dataset.

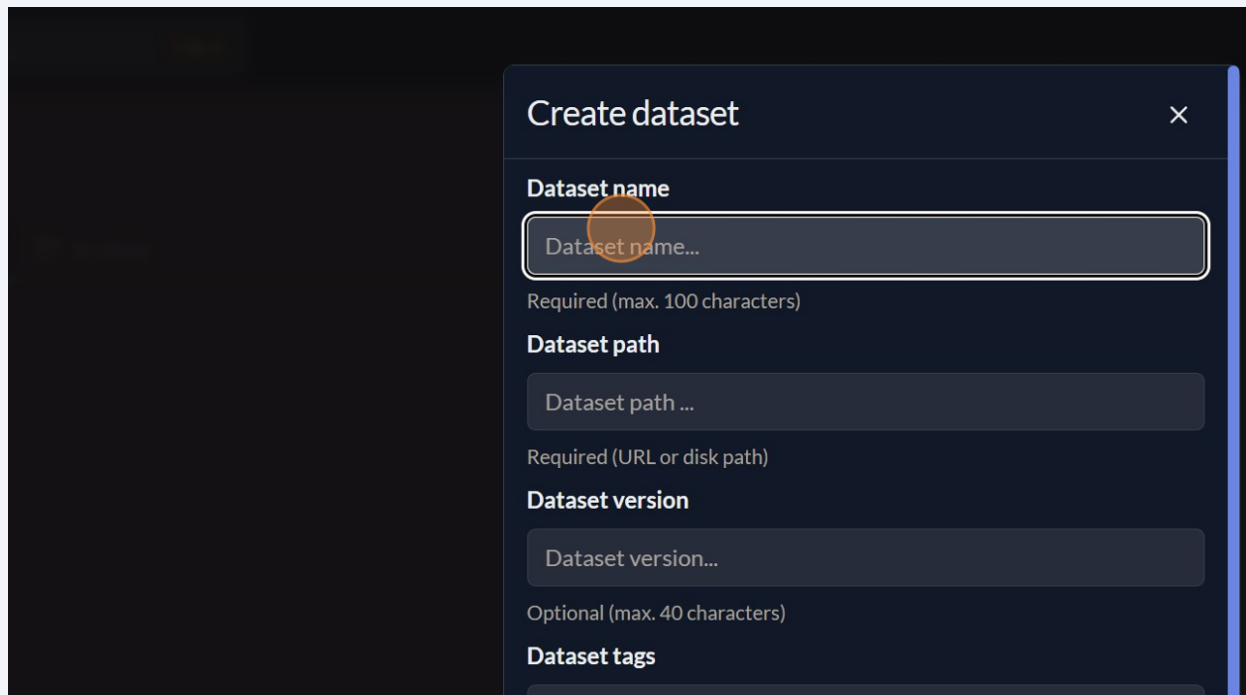

Step-by-step guide on how to create your first dataset.

1 Navigate to <http://localhost:3000/datasets>.

2 Click **Create new dataset** button.

3 Fill in **Dataset name** field.

The screenshot shows a dark-themed 'Create dataset' dialog box. It contains four input fields: 'Dataset name', 'Dataset path', 'Dataset version', and 'Dataset tags'. The 'Dataset name' field is highlighted with an orange circle. Below each field is a label indicating its requirements: 'Required (max. 100 characters)' for the name, 'Required (URL or disk path)' for the path, 'Optional (max. 40 characters)' for the version, and no label for the tags field.

**Create dataset** ×

**Dataset name**

Dataset name...

Required (max. 100 characters)

**Dataset path**

Dataset path ...

Required (URL or disk path)

**Dataset version**

Dataset version...

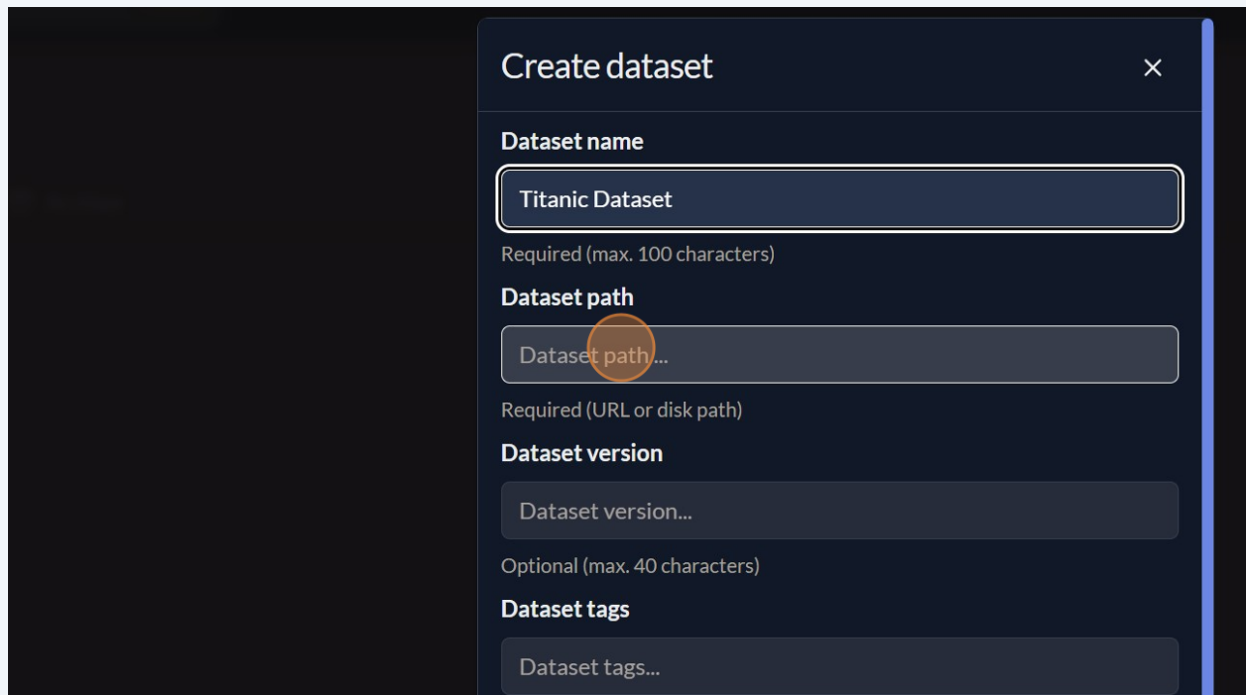

Optional (max. 40 characters)

**Dataset tags**

**Dataset name** is required and cannot be longer than 100 characters.

4 Fill in **Dataset path** field.

The screenshot shows a 'Create dataset' dialog box with the following fields:

- Dataset name**: A text input field containing 'Titanic Dataset'. Below it, the text 'Required (max. 100 characters)' is displayed.
- Dataset path**: A text input field containing 'Dataset path...'. This field is highlighted with an orange circle. Below it, the text 'Required (URL or disk path)' is displayed.
- Dataset version**: A text input field containing 'Dataset version...'. Below it, the text 'Optional (max. 40 characters)' is displayed.
- Dataset tags**: A text input field containing 'Dataset tags...'.

 **Dataset path** is required and should be web link (URL) or local disk path.

**5** Fill in **Dataset version** field. (optional)

The screenshot shows the Kaggle dataset creation interface for the 'Titanic Dataset'. The form includes several fields: 'Dataset path' (containing a URL), 'Dataset version' (highlighted with an orange circle), 'Dataset tags', and 'Dataset description'. The 'Dataset version' field is labeled as optional and has a maximum character limit of 40.

Titanic Dataset

Required (max. 100 characters)

**Dataset path**

<https://www.kaggle.com/c/titanic/download/train.csv>

Required (URL or disk path)

**Dataset version**

Dataset version..

Optional (max. 40 characters)

**Dataset tags**

Dataset tags...

Optional (max. 150 characters, comma separated)

**Dataset description**

Dataset description...

**Dataset version** is optional, but cannot be longer than 40 characters.

6 Fill in **Dataset tags** field. (optional)

<https://www.kaggle.com/c/titanic/download/train.csv>

Required (URL or disk path)

**Dataset version**

v1.0.0

Optional (max. 40 characters)

**Dataset tags**

Dataset tags...

Optional (max. 150 characters, comma separated)

**Dataset description**

Dataset description...

Optional (max. 500 characters)

Create dataset

**Dataset tags** are optional, but cannot be longer than 150 characters, and different values should be separated by commas!

7 Fill in **Dataset description** field. (optional)

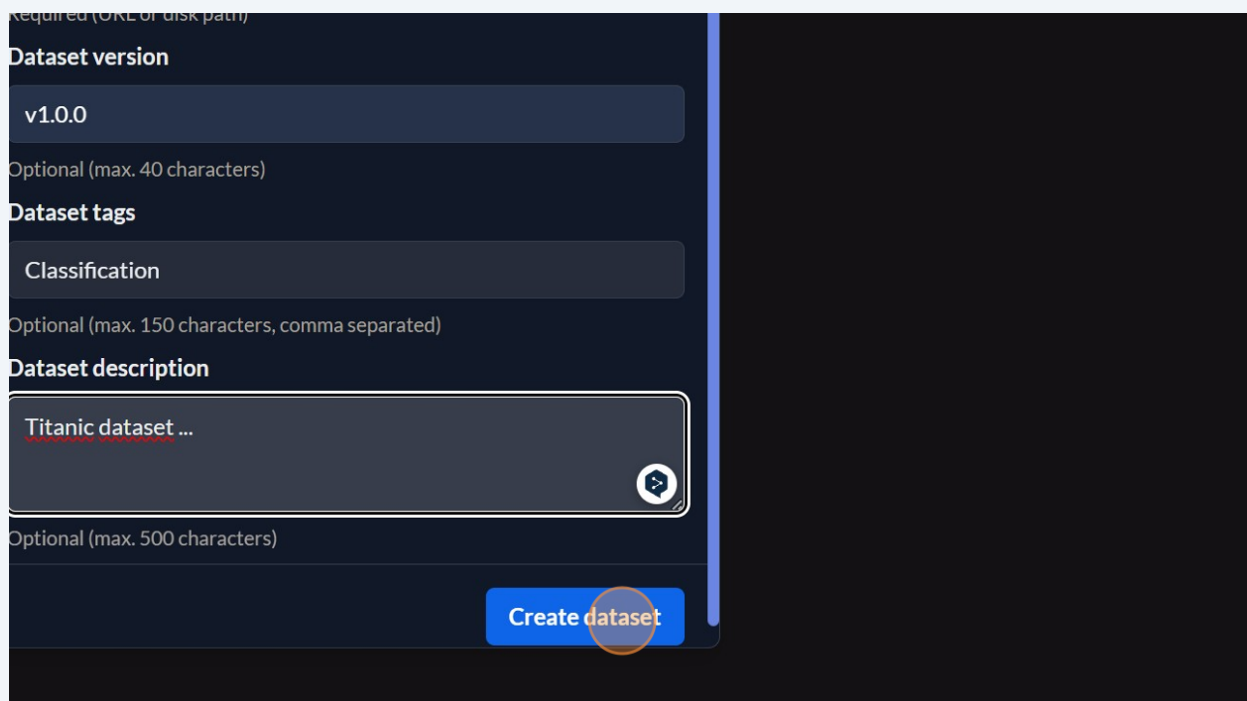

The screenshot shows a dark-themed form for creating a dataset. It includes the following fields and labels:

- Dataset version**: A text input field containing "v1.0.0". Above it is the label "Required (URL or disk path)". Below it is the label "Optional (max. 40 characters)".
- Dataset tags**: A text input field containing "Classification". Above it is the label "Optional (max. 150 characters, comma separated)".
- Dataset description**: A text input field containing "Dataset description...". Above it is the label "Optional (max. 500 characters)". This field is highlighted with an orange circle.

A blue button labeled "Create dataset" is located at the bottom right of the form.

 **Dataset description** is optional, but cannot be longer than 500 characters.

8 Click **Create dataset** button.

The screenshot shows a dark-themed form for creating a dataset. It includes several input fields: 'Dataset version' with 'v1.0.0' entered, 'Dataset tags' with 'Classification' entered, and 'Dataset description' with 'Titanic dataset ...' entered. A blue 'Create dataset' button is at the bottom right, circled in orange. The form also has optional character limits for each field.

required (URL or disk path)

**Dataset version**

v1.0.0

Optional (max. 40 characters)

**Dataset tags**

Classification

Optional (max. 150 characters, comma separated)

**Dataset description**

Titanic dataset ...

Optional (max. 500 characters)

Create dataset

9 And there you go! Enjoy your first dataset!
