

# How to create an empty monitored model. Scribe<sup>®</sup>

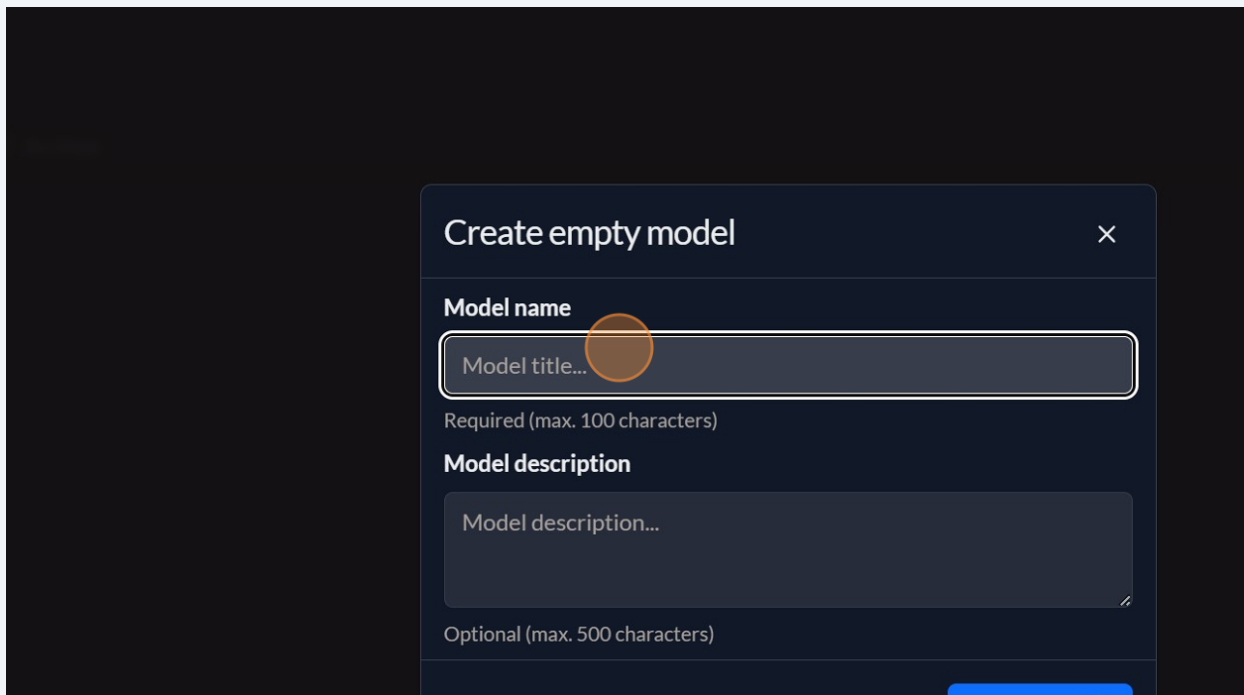

Step-by-step guide on how to create an empty monitored model.

1 Navigate to <http://localhost:3000/models>.

2 Click **Create empty model** button.

3 Fill in **Model name** field.

The screenshot shows a dark-themed dialog box titled "Create empty model" with a close button (X) in the top right corner. Inside the dialog, there are two main sections. The first section is labeled "Model name" and contains a text input field with the placeholder text "Model title...". A red circle is drawn around the right side of this input field. Below the input field, the text "Required (max. 100 characters)" is displayed. The second section is labeled "Model description" and contains a larger text area with the placeholder text "Model description...". Below this text area, the text "Optional (max. 500 characters)" is displayed. At the bottom right of the dialog, there is a blue button.

 **Model name** is required and cannot be longer than 100 characters.

4 Fill in **Model description** field. (optional)

Create empty model

Model name

Empty model

Required (max. 100 characters)

Model description

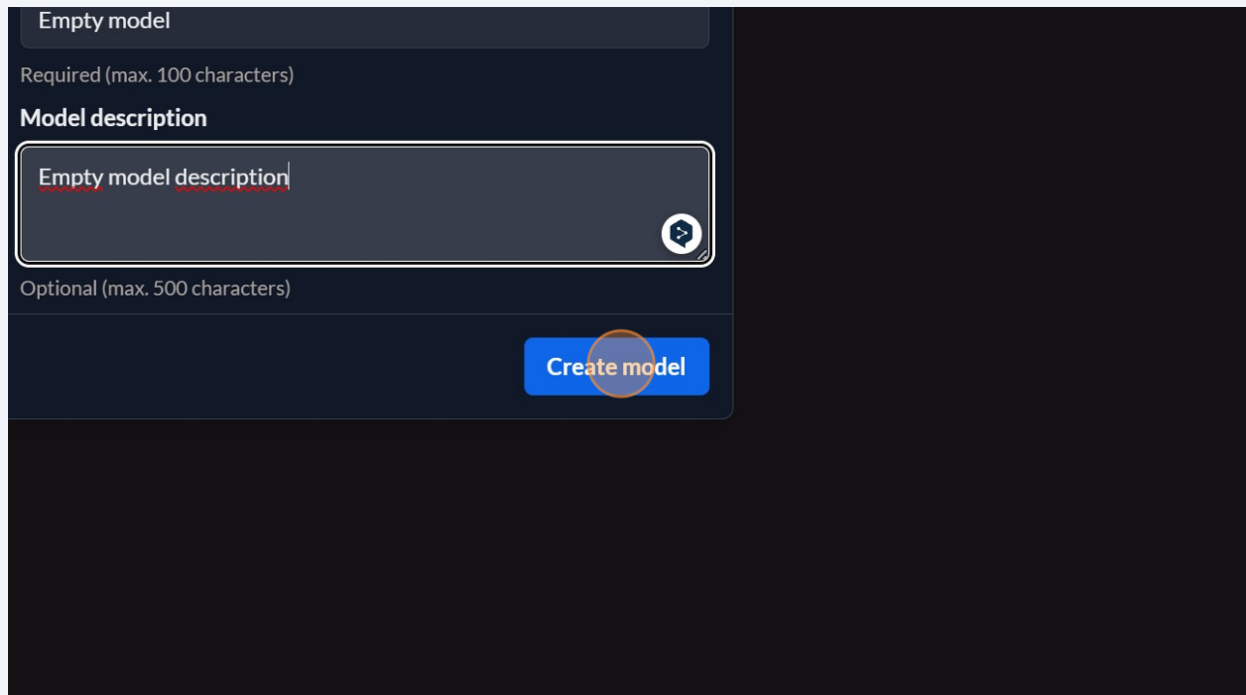

Model description...

Optional (max. 500 characters)

Create model

 **Model description** is optional, but cannot be longer than 500 characters.

5 Click **Create model** button.

The screenshot shows a dark-themed user interface for creating a model. At the top, there is a header 'Empty model'. Below it, a text input field is labeled 'Required (max. 100 characters)'. Underneath this is a section titled 'Model description' with another text input field labeled 'Optional (max. 500 characters)'. The description field contains the placeholder text 'Empty model description'. To the right of the description field is a small circular icon with a right-pointing arrow. At the bottom right of the form, there is a blue button with the text 'Create model'. An orange circle is drawn around this button, indicating it should be clicked.

6 And there you go!
