

How to edit an existing project.

Step-by-step guide on how to edit the title, description and status of an existing project.

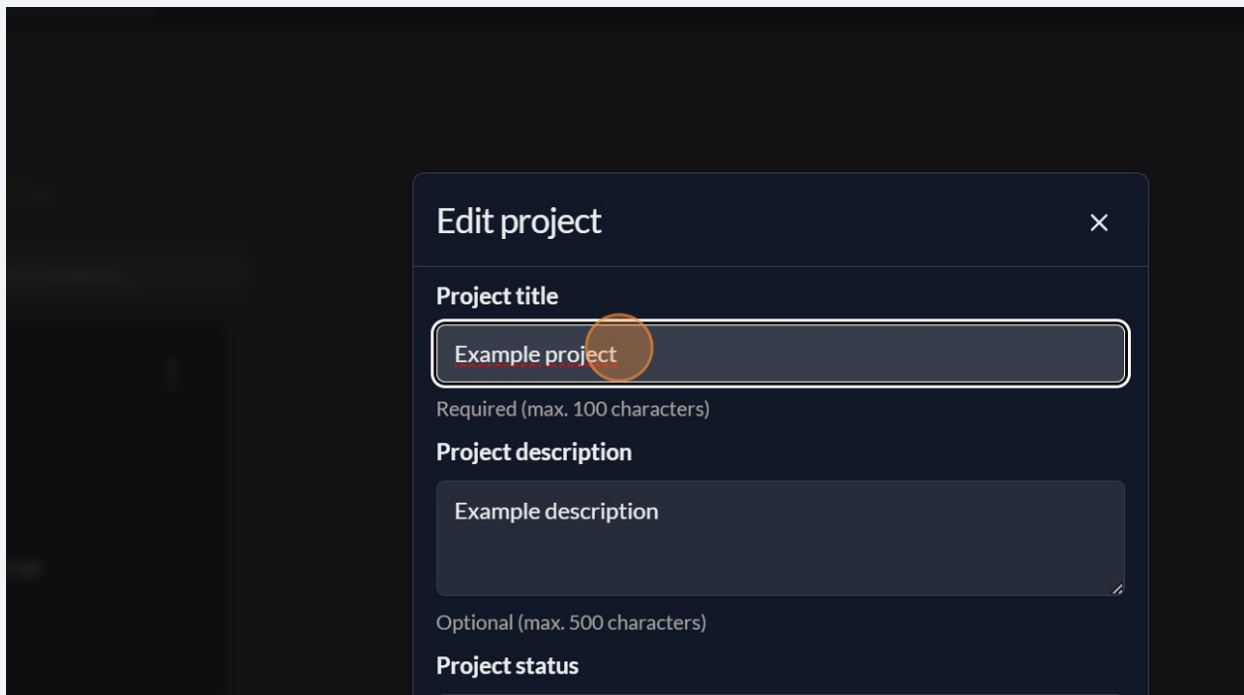

1 Navigate to <http://localhost:3000/projects>.

2 Click on **Projects actions** and click **Edit project information**.

 To edit an existing project you must change at least one of its parameters (title, description or status).

3 Edit **Project title** field.

The screenshot shows a dark-themed 'Edit project' modal window. At the top, the title 'Edit project' is displayed next to a close button (X). Below the title, the form is organized into sections. The first section is 'Project title', which contains a text input field with the placeholder text 'Example project'. This field is highlighted with an orange circle. Below the input field, the text 'Required (max. 100 characters)' is displayed. The second section is 'Project description', which contains a larger text area with the placeholder text 'Example description'. Below this text area, the text 'Optional (max. 500 characters)' is displayed. The third section is 'Project status', which is partially visible at the bottom of the modal.

 **Project title** cannot be empty and longer than 100 characters.

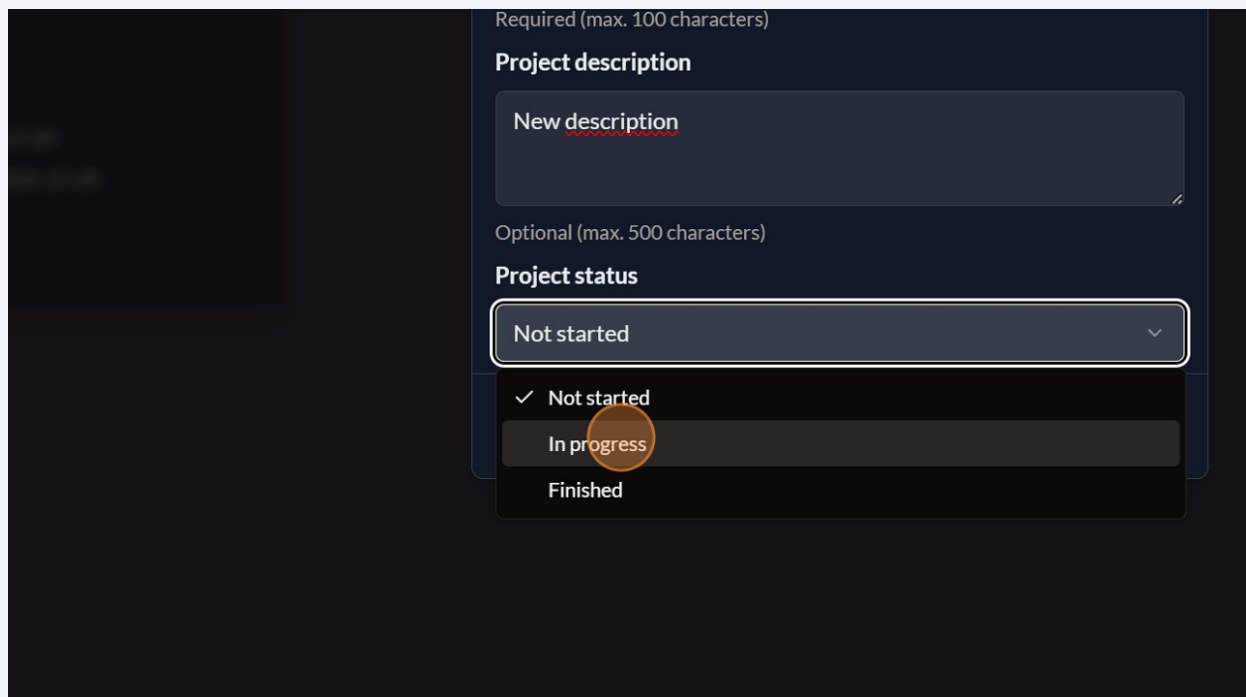

4 Edit **Project description** field.

The screenshot shows a dark-themed 'Edit project' modal. It contains three main input sections: 'Project title' with a text field containing 'New title' and a requirement of 'Required (max. 100 characters)'; 'Project description' with a text area containing 'Example description' (highlighted by an orange circle) and a requirement of 'Optional (max. 500 characters)'; and 'Project status' with a dropdown menu currently set to 'Not started'. A blue 'Update project' button is located at the bottom right of the modal.

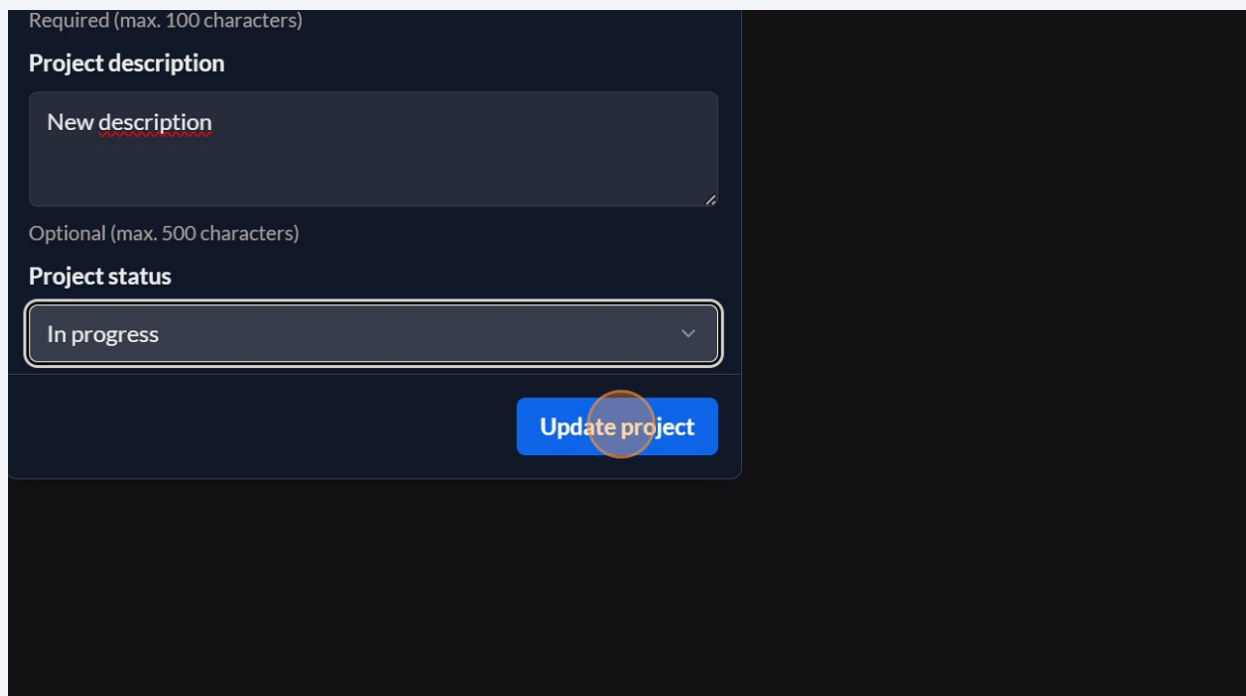

Project description can be empty, but cannot be longer than 500 characters.

5 Edit **Project status** field and select one of the available statuses.

A screenshot of a dark-themed user interface. On the right side, there is a form section. At the top, it says "Required (max. 100 characters)" followed by the label "Project description". Below this is a text input field containing the placeholder text "New description". Underneath the text field, it says "Optional (max. 500 characters)" followed by the label "Project status". Below the label is a dropdown menu currently showing "Not started". The dropdown menu is open, showing three options: "Not started" (with a checkmark), "In progress" (highlighted with an orange circle), and "Finished".

6 Click **Update project** button.

A screenshot of the same dark-themed user interface as in the previous step. The "Project status" dropdown menu is still open, showing the same three options: "Not started", "In progress", and "Finished". However, the "In progress" option is no longer highlighted. Instead, the "Update project" button, which is a blue button with white text, is now highlighted with an orange circle. The button is located at the bottom right of the form section.
